

**ABOUT US:**

The Anzalduas International Bridge has served as the most direct, safe, and efficient route between the Rio Grande Valley and Mexican cities since 2015, reducing travel time by as much as 45 minutes. This bridge counts on five southbound lanes, and an extensive commercial expansion to be completed by end of 2024.

## WHY CROSS WITH US?

The Anzalduas International Bridge (AIB) is located at one of Texas' most critical geographic sites. Over 150 international manufacturing facilities call our bi-national region home, many of which are less than 10 miles from the AIB. The construction of north-southbound inspection facilities at AIB will help satisfy the trade demand for commercial international crossings, improve transport times, and provide a safe and efficient route for logistics and supply chain management.
